

RE: NAB Petition 04-160

My husband and I are seniors who depend on our xm radio when we are traveling. It helps us keep up with the weather in the areas we will be driving. It is also a big help to avoid the traffic in the large cities you must drive thru going cross country.

I feel that if the FCC takes away the weather, traffic and other services from XM Radio they will be taking away my right to choose the stations I want to listen too and get needed information for safety.

Please do not make me give up my choice for radio to please the big business. The next thing I know you are going to tell me what type company I have to use for my internet. I am speaking for my husband on this also.
